1. Nourishing Lives

Yummy food at school!

Little did this single mom of twins, Harshini and Haneshri think of food or what they would eat, when she put them in the day care centre run by Vathsalya Charitable Trust in Bangalore.

She was totally relieved to learn that her girls have porridge and a health drink in the morning, followed by home-roasted peanuts and jaggery. At noon, they have a tasty meal and salad prepared from the nutrition meal packets from RAHI. And a little before they leave for their home, they eat a healthy and common fruit of the season.

The twins are healthy and active now and their physical and cognitive development has improved immensely. Very recently, they have even started dining at the table, and are now able to eat on their own!

The caregivers find that the tasty nutrition packets provided by RAHI which is a carefully compiled diet of essential and seasonal vegetables, minerals and vitamins helps their children stay active and healthy while reducing their risk of falling sick.

MEALS SERVED

Our meal packages mainly benefit children and people from various old age homes, orphanages, child shelter homes, schools, slums, community centres and patients suffering from different ailments.

Emergency support is provided by sending meals to the affected areas with Gift-in-kind like water filters, hygiene kits and household items.

Our Hunger Champions!

And we could never do this without YOU!

The number of Hunger Champions we could reach out to and engage this year nearly **doubled!**

Out of a total of **18,210** Hunger Champions we have packaged meals with in India from inception, **9,356** joined us this year!

*Just 50 people can package about 10,000 meals in an hour!
Hunger Champions are not just packaging meals
Hunger Champions are changing lives one meal at a time!*

MEASURE

PACKAGE

Future plans

In 2018, our target is to reach 6000 beneficiaries regularly and engage at least 12,000 Hunger champions in packaging 3 million meals.

2. Strengthening Communities

We work with rural communities on agriculture, income-generating initiatives, improving farming systems, Water, sanitation, hygiene (WASH) and by providing Gifts in-kind aid.

Sustainable livelihood - Moringa

RAHI is partnering with Jai Prabha Mahila Vikas Kendra in Sitamarhi District of Bihar to pilot a sustainable livelihoods project for the farming communities in the area, funded by Rise Against Hunger (US).

The first year pilot aims to provide a sustainable opportunity to 100 farmers to earn a steady income and gain access to sufficient, affordable food and nutrition for their livestock and families. Moringa, which grows well in the Bihar climate, can be harvested every 45 days and generate more consistent income for the farmers compared to one harvest for rice and wheat.

By training farmers on how to grow moringa, our aim is to -

- | | | | |
|---|----------|----------|---|
| Increase the per acre income of 100 farmers and their families (500 people) by promoting moringa planting in one acre units | 1 | 2 | Increase return on livestock by promoting goat rearing and cattle rearing based on moringa feed |
|---|----------|----------|---|

Future plans

With the success of the first year, we plan to scale up over the next four years with 500 farmers and their families, impacting a total of 2,500 beneficiaries.

In western Odisha, drought has been a regular phenomenon since the 1990s. In this critical scenario, RAHI, through Ahinsa Club and a few local organizations has been working with farmers to help them get access to critical information about government services on crop improvement, farming technologies and credit. The project creates a platform for the farmers and other stakeholders to discuss challenges and develop a joint action framework to build an enabling environment for famers to access opportunities and resources.

This is an ongoing project and we will share the success of this project in the coming year.

3. Disaster Relief

1 Rehabilitation and food security support- Drought relief in Odisha

2 Gift-in-kind support (Glucon-D, water filters, hygiene kits, household items)"

3 Food aid to flood affected locations - Bangalore, Bihar and Assam

Drought relief in Odisha

Relief from Sunstrokes and dehydration

RAHI has been doing its bit to save people from dehydration and sunstrokes which are a common occurrence in Odisha in summer. During the acute summers, Kraft Heinz has been supporting Rise Against Hunger India to provide Glucon D Am Panna, Orange & Lime in Puri District since 2015.

This year too, 14,11,624 people (3,162 units of Glucon D mix drinks) in Puri District and the Bargarh/ Balangir region were saved from dehydration and sunstrokes from April to June 2017

Water dispensers

To address the issue of safe drinking water, we have also built 'water counters' and 'chahalas'. 20 water such water counters and chahalas were put up. New wells were also dug to provide clean water for all.

Jal Seva - Campaign on water usage and hygiene

Rise Against Hunger India, in collaboration with Astha and Ahinsa club in April 2017, began a campaign - Jal Seva' on water usage and hygiene. Training on chlorination, water use and hygiene; and health check-ups were conducted as well as Glucon D was distributed.

We reached out to 86,890 people in Odisha through this project.

Flood Response – Karnataka, Assam and Bihar

Record-breaking rains in 2017 in Bangalore, Karnataka had inundated several areas. Nearly 400 families living nearby in the low-lying slums had been completely marooned. Packaged meals from NetApp India were handed over to Gilgal Trust. The organization provided cooked meals to the affected families. We would like to thank NetApp India team for the timely support to these families.

In August 2017 last year, 25,488 Meals were sent to Morigaon district in Assam to 2300 people with the help of Times Foundation, Action Aid India and Indigo.

Hope Foundation received meals to be distributed to flood affected families in Araria in Bihar.

Future plans

At RAHI, We are currently working on disaster preparedness processes and documentation to help us to stick to our standardised and effective emergency response on ground with immediate effect.

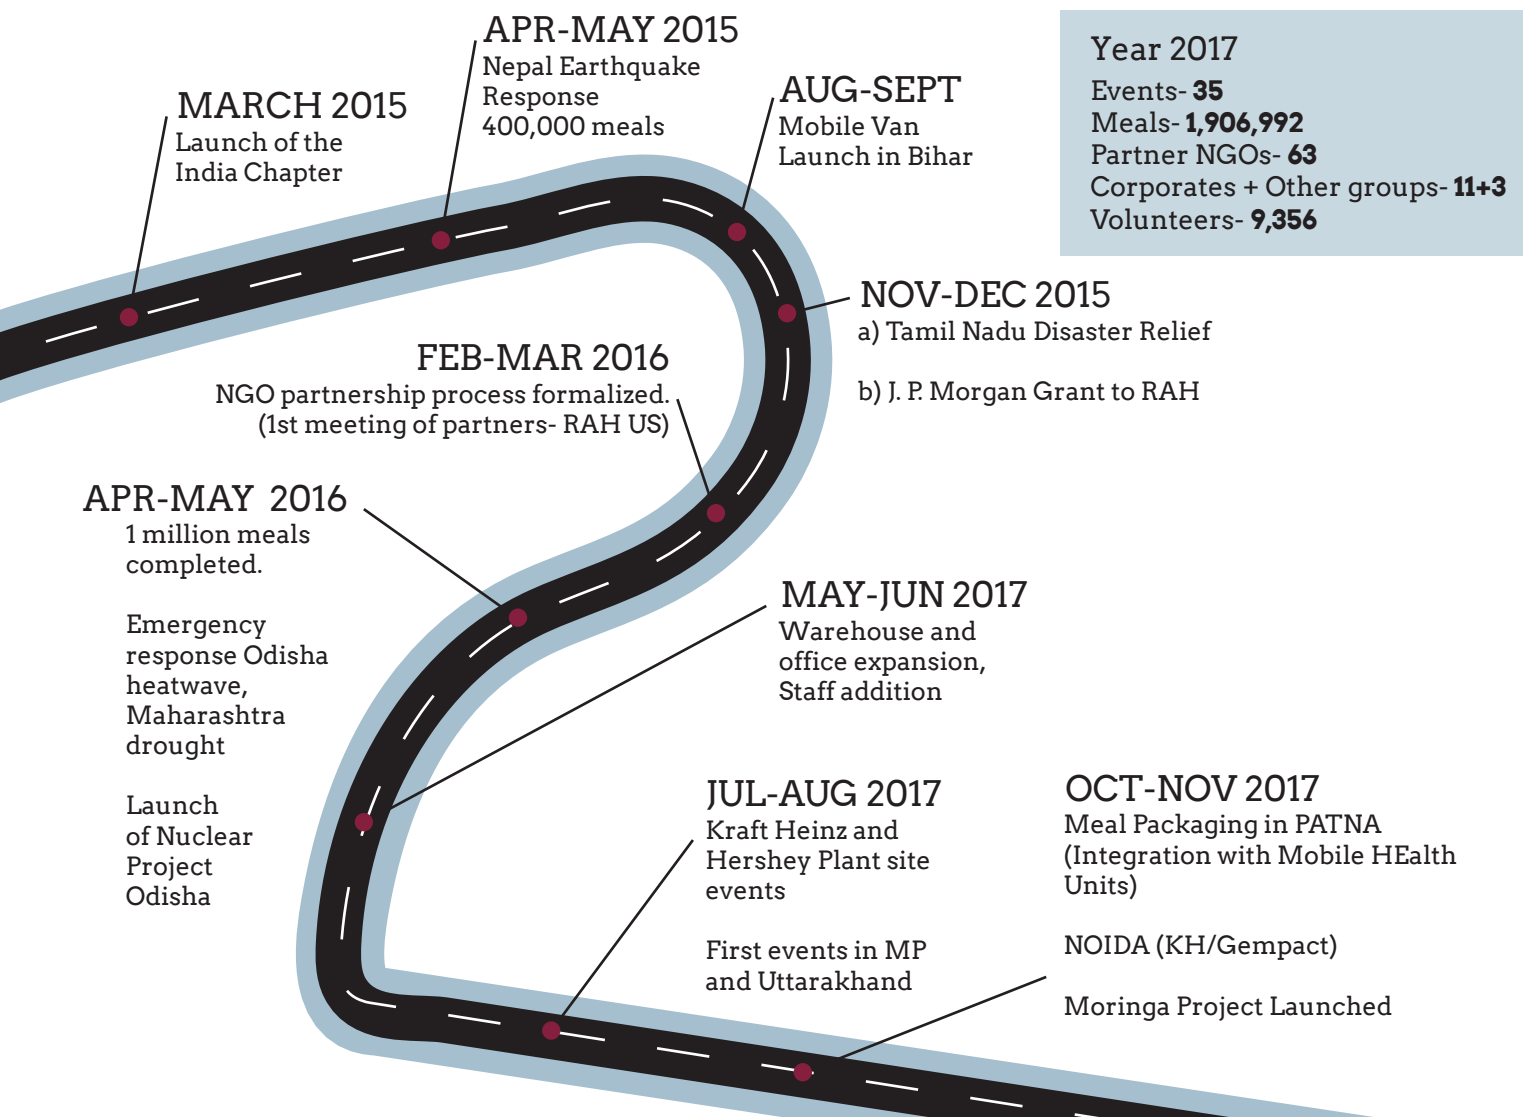

Background

RAHI provides food and life-changing aid to the India's most vulnerable, mobilizing the necessary resources to end hunger by 2030

Rise Against Hunger India (formerly Stop Hunger Now India) is driven by the vision of a world without hunger. Our mission is to end hunger in our lifetime by providing food and life-changing aid to the world's most vulnerable and creating a global commitment to mobilize the necessary resources.

Rise Against Hunger's India program formally started in 2015 as a result of increased interest and support by corporate partners to engage in our meal packaging program. In 2013, the first meal packaging event was held in Bangalore which was facilitated by the US team, and this acted as the first step towards creating a sustained effort in India towards ending hunger. Throughout 2014, several events were held with multiple corporate partners in Bangalore packaging more than 280,000 meals. These regular meal packaging events led to the opportunity to establish a permanent program base to mobilize support and create champions for active engagement. An independent entity was created in India in 2014 which was formally registered as a Charitable Trust in October 2014. In 2017, the name was changed to Rise Against Hunger India.

Driving Rise Against Hunger India's work is the recognition that ending hunger is more than just feeding people. Our efforts are therefore directed towards expanding the hunger-fighting programs beyond meal packaging and distribution.
