### **Dietary Supplementation Program (DSP)**

We continued to provide sustained interventions among children through the distribution of nutritious meals and by conducting nutrition education sessions.

In Magdalena, Laguna alone, we were able to serve over 46,000 meals to around 300 school children daily. The assessment of the body mass index (BMI) of these children revealed improvements, with 6% increase in children with a normal BMI for their age after 10 months of enrollment in our nutrition program. Moreover, cases of wasting, severe wasting, and obesity also decreased.

Our community-based feeding program in Calauan, Laguna also showed great results this year.

The statistical figures reveal a positive change in the nutritional status of children aged 2 to 5 years old and a 20% increase in the percentage of children with normal height for their age. Moreover, the percentage of severely stunted children has also decreased significantly from 67.8% to 17.4%.

essential household items. Our food bank at Better World Tondo alone was able to distribute grocery packs to families each month, serving 3,588 individuals in total.

### Jeepney Kitchen and Food Bank (JKFB)

Going strong in its second year was our JKFB which has continued to deliver freshlycooked nutritious meals as well as grocery items to vulnerable communities in Taguig, Pasay, Pasig, and Parañaque.

## RESPONDING TO EMERGENCIES

Being a high-density urban area, fires in Metro Manila are common occurrences. Through the help of our partner NGOs—Tanghalan Mandaluyong Inc., LORENA NCR, Community Organizers Multidiversity, and the Pasig City Local Council of Women—we were able to distribute food packs to a total of 2,432 fire victims in Mandaluyong, Manila, and Pasig.

In addition, we supported those affected by disasters in provinces outside of the National Capital Region. Through our partner Gota de Leche, 500 individuals affected by the oil spill incident in Mindoro received assistance while 4,800 individuals affected by Typhoon Egay in Abra were extended support through the League of the Municipalities of the Philippines.

#### **Livelihood Programs**

Towards the end of the year, we kicked off a series of livelihood programs in partnership with AM Crown, Amway Philippines, and Barangay Ususan to provide people with income-generating opportunities.

Branded as the "Handog Pangkabuhayan Tungo sa Malusog na Pamilya" (Livelihood Program Towards Healthy Families), the program aims to provide participants with alternative sources of income and food, which can ultimately support their families' health and nutrition. Program beneficiaries acquired essential skills, such as financial literacy, entrepreneurship, urban gardening, and fashion jewelry-making.

### **GROWING THE MOVEMENT**

As we entered the post-pandemic new normal in July 2023, our corporate partners engaged us once more in their employee volunteer programs. For them, packaging our signature fortified rice-soy meals is a simple way volunteers can make such a big impact. On our part, the meal packaging events give us the opportunity to grow the movement by engaging more people in a meaningful activity.

Involving more than 6,000 volunteers from different companies, we have generated a total of 721,000 fortified rice-soy meals.

### **EXPANSION**

Ella Molina is a mother of a grade 2 pupil at Nueva Vizcaya's Central School, whose students have received surplus vegetables from NVAT.

This is good for the kids because there are kids who are used to frozen food. Somehow, vegetables are introduced to them. And at least, they might get to like vegetables more and they also learn that these types of food are very nutritious.

This is a big help for us as parents, more so now with the rising cost of commodities. They get packages almost every month.

- Ella Molina

In between planting and harvesting seasons, rice and vegetable farmer Rodolfo Valdez works at NVAT as a porter. He registered in the RAHP x NVAT agricultural program and has bartered produce for other food and household supplies.

I've been working at NVAT terminal since 2010. When business is slow, we throw some of our harvests because when prices are cheap and there's over supply, we can hardly sell.

Of course, I feel bad about it. Because our investment is wasted, if our vegetables are not sold, what will happen to us? We do not have income.

The program is a big help for us because now we have a place to bring our vegetables. Even if they've been stored already, or they're cheaper already, they still accept.

- Rodolfo Valdez
